

ATACAMA MILITARY DRYSUIT

BREATHABLE PROTECTIVE DRYSUIT

Constructed from a high quality, breathable lightweight fabric, the Survitec Atacama Military Drysuit offers excellent performance and comfort in all conditions. The Atacama has been designed for use in a maritime environment and contains a number of intelligent design features to increase comfort and optimise mobility, enabling the wearer to easily conduct a range of mission critical tasks. This includes swimming, running, assault manoeuvres and weapons deployment. The Atacama Military Drysuit also facilitates complete integration with a number of additional survival equipment including body armour, load carriage equipment, headwear and hand/foot wear.
