MK42B

AIRCREW LIFE VEST

The Mk42B Aircrew Life Vest is the latest in Rotary Wing and Large Fixed Wing aircrew equipment assemblies, harnessing Beaufort expertise and pedigree across major international platforms. Qualified and tested in collaboration with the UK MOD, the Mk42B Aircrew Life Vest features a low profile stole with reduced volume to the rear of the neck to improve head mobility when wearing a helmet. The Life Vest features dual bladders for redundancy and has superior self righting and freeboard capabilities. The Life Vest attaches to a waistcoat assembly constructed of lightweight and inherently fire retardant fabrics to reduce mass and thermal burden. Adaptable to suit multiple aircrew roles and the wearer's individual requirements, the Mk42B introduces a new benchmark in Aircrew comfort, mobility and in-water performance.

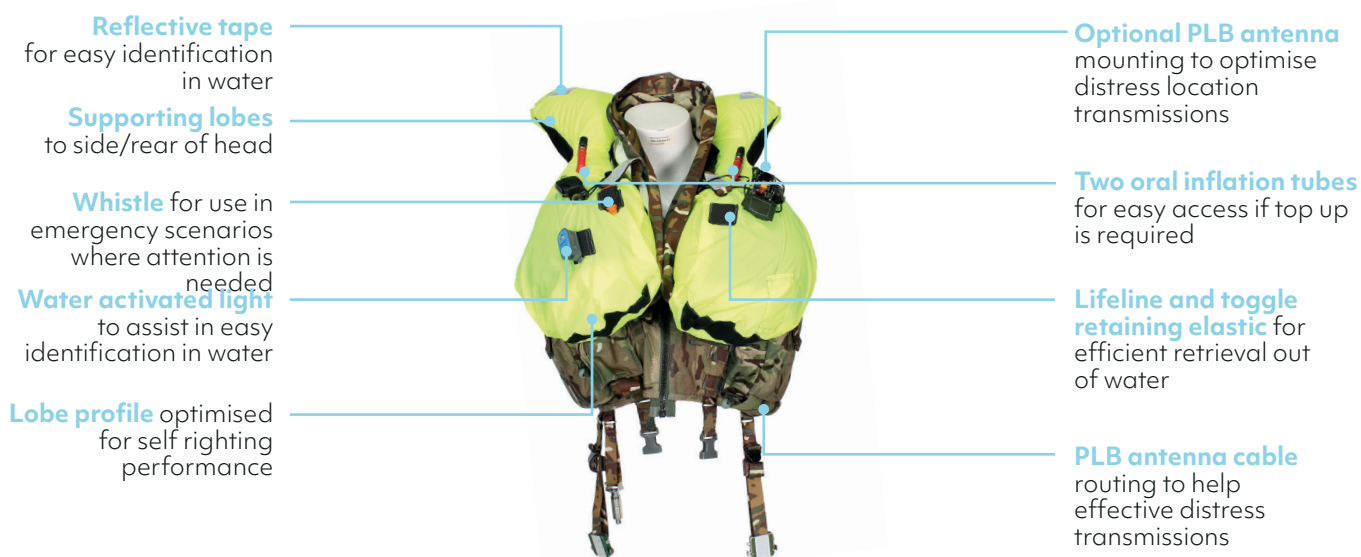

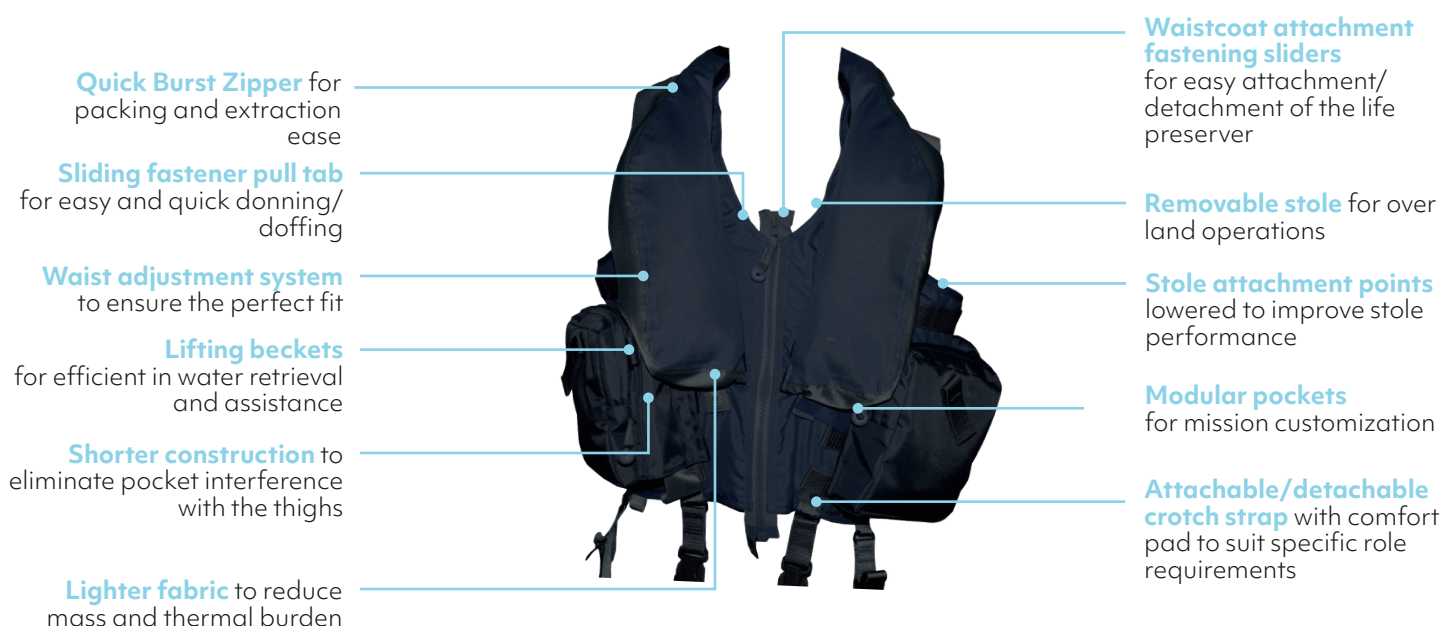

BENEFITS

- Fully integrated system
- Tested and Qualified on rotary and fixed wing aircraft
- Modular Pockets for equipment stowage accordance to the mission
- Improved comfort and mobility with reduced thermal burden
- Flame and abrasion resistant
- Various colour options available

*“Setting the standard for
in water performance and
survival capability”*

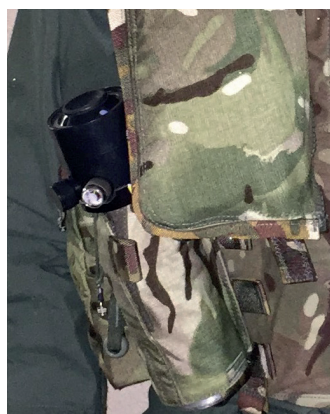

MK42B

Technical Information

Buoyancy	350N
Inflation Mechanism	Manual
CO2 Cylinder	2 x 40g including cylinders and inflation mechanisms
Colours	DPM, Sage, Sand*, Blue/Black* 
Size	Four sizes available
Materials	Aramid Fabric
Example Part Number	1013805

* Under Development

Optional Accessory:
HEED 3 Short Term Air Supply System (STASS) to assist in under water evacuations
