SUBMARINE ESCAPE SURVIVAL EQUIPMENT

Fully welded suit with
fully integrated welded liferaft

Fully welded integrated submarine escape system. The Submarine Escape Survival Equipment is a full-body welded garment designed for pressurised tower escape with thermal protection and a fully integrated welded single-seat liferaft for increased surface survivability.

BENEFITS

- ⦿ Buoyancy relief for reducing excess buoyancy in tower escape scenarios which eases the strain of remaining plugged into the air supply
- ⦿ Greater thermal protection
- ⦿ Increased visibility through an improved viewing panel increasing spatial awareness
- ⦿ Integral neck seal to increase surface survival and reduce air and water ingress
- ⦿ Fully integrated welded single seat liferaft offering over 24 hours of surface survival
- ⦿ Non slip thermal soles supporting better protection and enhanced grip
- ⦿ Increased hose size to reduce air wastage and improve performance

// Submarine escape equipment designed by submariners for submariners //

RESOLUTE

TECHNICAL DATA

RESOLUTE	
Safety at Depth	Designed to escape from 300 meters
Improved Air Usage	Neck seal presents excess air into the suit improving air efficiency
Rapid Ascent	Provides over 300N of buoyancy
Keeps Occupant Warm	Improved thermal protection for improved survivability
Excellent Buoyancy	Integral neck seal on the suit and a fully welded raft increases surface survival

ORDERING INFORMATION

Code	Product Name
1020199	Resolute SEIE
